# Who are we?

Carbon Wallet is a platform that transforms  
conscious actions into rewards.

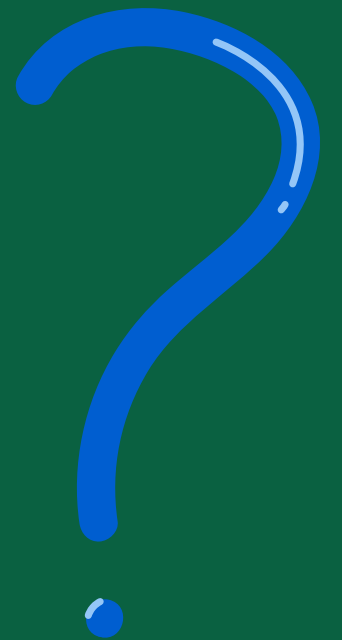

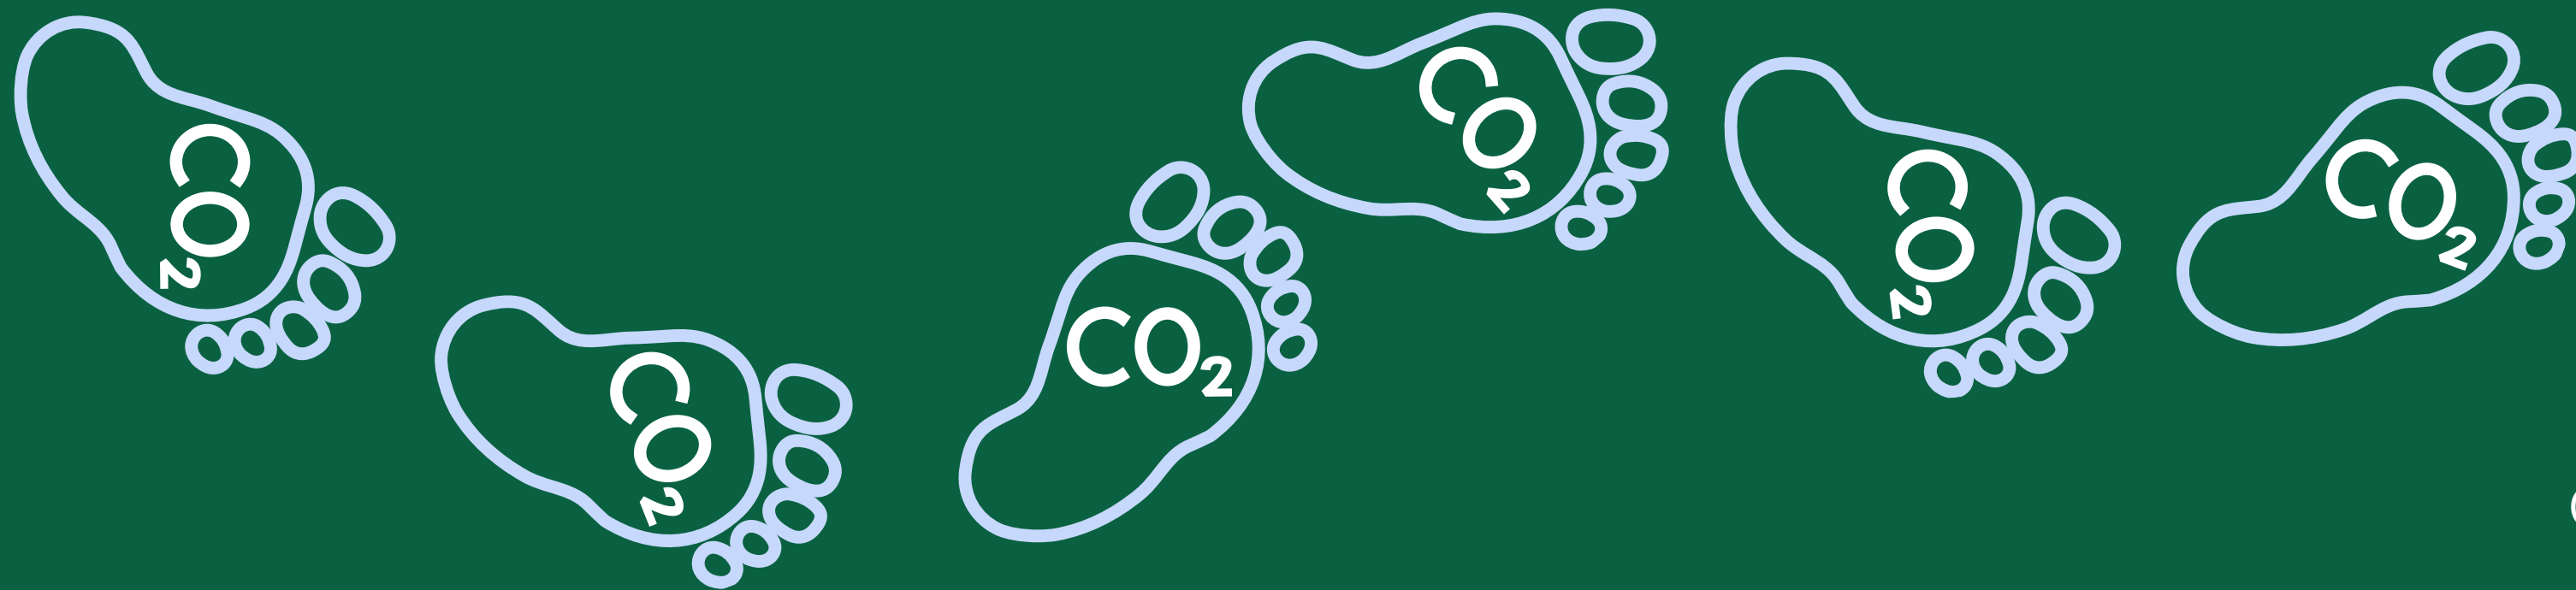

Engaged individuals record their habits monthly, and based on that, they are rewarded with Carbon Points.

On the other hand, companies aligned with sustainability can use these points to offset their own emissions, earning carbon credits.

Without sacrificing environmental commitments!

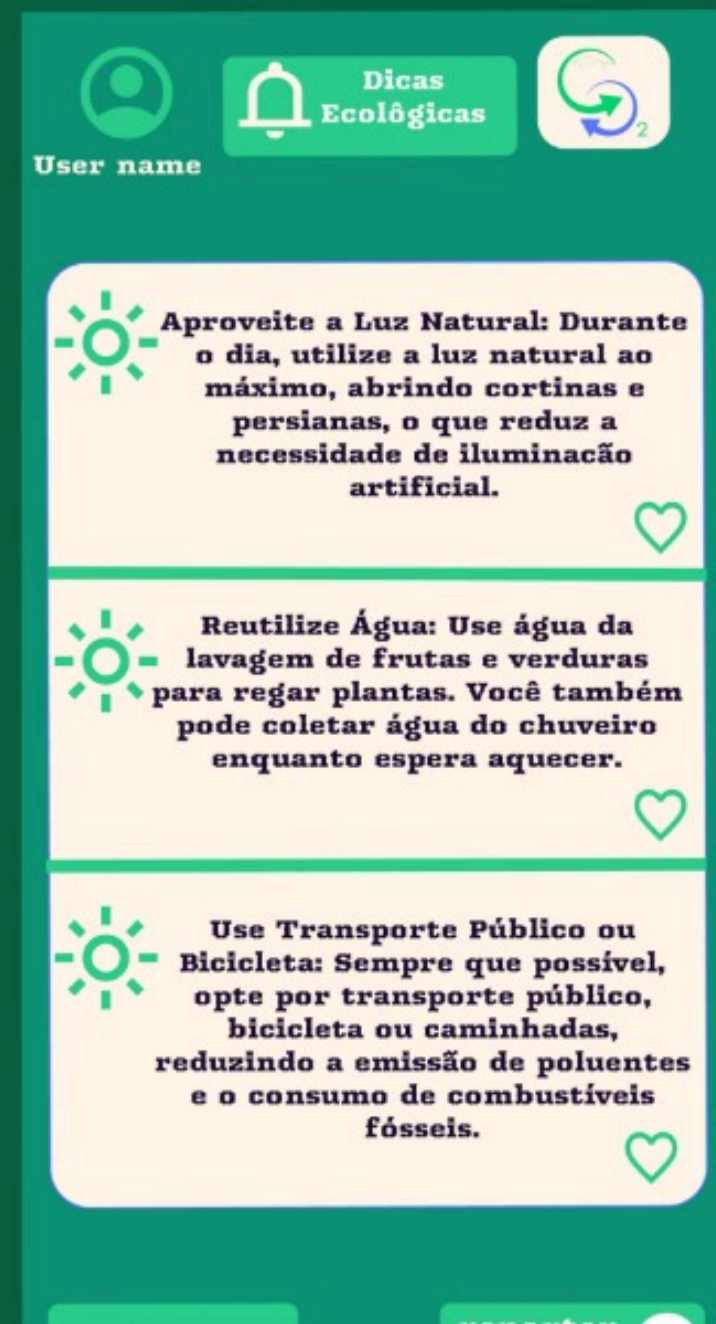

# And where do the leftover carbon points go?

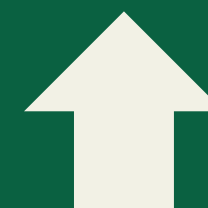

**CSR**  
(Corporate Social Responsibility)

Individual actions

generate collective benefits

"The **PLANET** thanks you—and **YOU** will too!"
